To whom it may concern,

I have recently been elected as one of the eco-councillors for my school, and was proud to be given my badge in a special assembly. In the first week of being an eco-councillor, everyone wanted to see my badge!

However, I was disappointed that my badge came in its own plastic packet that isn't eco-friendly. This doesn't make sense! Why did all the badges have their own plastic packet?

I would like to ask you to start using eco-friendly or recycled packaging please.

Please let me know what you are going to do about this important issue.

Yours faithfully,

James

Eco-Councillor at Parsons Down Partnership of Schools
