

Switch off posters displayed around the school

# ENERGY

Leaving a light on in a room while you are not using it, can waste the battery and you will have to pay more money for energy bills.

When you have been using your laptop, but then forget about it and leave it on, make sure you have some type of reminder to save electricity in the house.

Leaving a light or an electronic on, can always be an accident, but let's try and remind ourselves that turning a light off in one room can save the planet. Some people might not respect you turning the light off when they are just coming back, but the earth does.

- turn off lights!
- turn you electronics off when your not using them!
- keep heat inside the house if you have heaters on!

## Saving Energy

Saving Energy is not only useful for the planet, but your bank accounts do not need to get involved. If you switch off when your done pollution drops down and money prices go up!!!

**Switch OFF!!!**

You can use phones but instead use it less often instead you could go on your bike, scooter, a run etc.... Enjoy the fresh air!

### Top tip

Even if your in a class room ready to go to work when you have switch of any electronics. A little move can make a BIG difference.

**This Earth is Dying  
SAVE THE WORLD**
