

Eco Schools 2024-25

Environmental Review

Thank you for completing the Environmental Review. We recently had a meeting and used the information to discuss the areas that we would like to focus on this year.

Today we are going to introduce the topics and ask you in classes to suggest actions.

Global Citizenship

Climate Change will affect communities in different ways. Our Global Citizenship topic encourages us to take an active role in our local community and work together to make our planet more peaceful, sustainable, and fair!

We can help support the goals through celebrating diversity, pupil-planned fundraising for environmental charities, or making changes to the products you buy!

Global Citizenship

- Create a buddy scheme for pupils to support one another.
- Link with another school in a different country.
- Organise an event that celebrates cultural diversity

Healthy Living

Did you know that your health and our planet's health are linked?

Research shows time spent in nature reduces stress, improves mood, and reduces the risk of mental health problems.

This could be through growing fruit and vegetables, promoting more plant-based food options in the school canteen, or creating sensory areas where young people can relax.

Healthy Living

- Work with the School Council to support OPAL and making lunchtimes better
- Learn about growing fruit and vegetables.
- Work with the school canteen to plan healthy and planet-friendly menu.

School Grounds

The School Grounds topic is for Eco-Committees who want to improve their setting for students, staff, plants, animals and insects.

Popular actions for this topic include rewilding areas, planting trees and hedgerows, and promoting outdoor learning.

School Grounds

- Create a wildlife friendly garden and develop the allotment area.
- Start a gardening club.
