

Questionnaire – Waste Warriors Week

Class: Woodpecker

Year Group: 2

Pre-Learn

1. What is food waste?

When you give food away.

When you are eating something and you don't want the other half and you bin it.

When you get all the vitamins and the other bits and they go down.

When someone is eating something from their packed lunch and they don't eat it all and throw it in the bin.

2. Why is food waste a problem?

Because if someone wants to eat and you wasted it they can't eat it and it's a waste.

Because your parents can't eat anything or your friends.

Because they don't like their food.

Because every day there is a truck full of food going into the ocean and it is bad for sea life.

Because we have different food.

It is a waste of food and bad for sea life and animals can die

That's a waste of food.

If they waste everything there is no more food in the world.

3. Why is food waste bad for the planet?

Because it can kill sea life.

Sometimes the truck with food waste goes under the ground and it is bad for plants.

4. How can we end food waste?

Eating all our food.

Saving your food – if you don't want the other half have it tomorrow.

Post-Learn

1. What is food waste?

Food waste is when you put food in the bin because you do not eat it because you do not like it or you are full.

Food that goes rotten and out of date – we should eat it before it goes yucky.

2. Why is food waste a problem?

Because our Earth will turn into a giant rubbish bin and very smelly.

If it goes in the ocean sea creatures will eat it and they might die.

It can be a waste of water – it takes 100 buckets of water to grow the crops for 1 loaf of bread!

3. Why is food waste bad for the planet?

It could kill the sealife if they eat rotten food.

Make our planet into a rubbish bin.

Use lots of water and crops but then it all goes to waste.

4. How can we end food waste?

Food that we do not eat we can put it in the fridge for tomorrow.

Put food waste in the compost bin.

Have small portions if you are not hungry.

Look at the date on the food and do not buy it if it is tomorrow!

Eat all of your food.

When you go to the food shop just get the food you need

Give leftovers to your chickens or dogs (if they are allowed to eat it!)

Eat it or save it for the next day
